

# Last but not least...

## Data Analysis Projects:

- Co-chair of LSC “Upper Bounds on Inspiring Sources” (with Patrick Brady), and participant in “Bursts Group”. We plan to dedicate a student and myself to integrate “detector characterization” to these tasks.
- “Beam Analysis” of interferometer signals.
- Statistics of time intervals between threshold crossings (T. Summerscales, S. Finn)
- “Wavelet analysis” (S. Finn, M. Hsu)
