LSC Meeting, 8/14/01
LIGO-G010305-00-M

A Request to LSC Members:

Please e-mail me a 1 page summary of what NSF support you expect to ask for in FY2002.

NOTE: The new proposal "target date is September 26,2002.

Purpose is to give Physics Division Director a "heads-up" concerning pressures in the program as LIGO and the LSC begin the science run. We probably won't know the Gravity Program budget until next winter or spring, but I would like to begin discussions with the Physics Division management before I leave NSF at end of September.

Please include a best estimate of budget request and a few lines supporting the request.

For those submitting renewal proposals in FY02, it would be useful to have you list your current award level.

For those on continuing grants who are planning to request supplements, list your expected FY02 increment and the supplementary request along with a few lines of justification.

Dr. Vic Cook

GRID Meeting

Where ? : NSF

When ? : Wednesday, August 29, 2001

**Organizer: Marv Goldberg
703-292-7374**

Informal meeting (not a large group) looking at evolution of Grid computing with view toward what can be done next year. There will be another infusion of ITR funds at NSF and this is meant to be an early brainstorming session to consider ways to tap into the new money. Emphasis will be on new ideas, players, different from those funded in last two competitions.
