### **ITM06 HR Integrated Scatter**

Test Date	Nov 25-29, 2013		
Author(s)	Liyuan Zhang, Margot Phelps, GariLynn Billingsley		
Approval(s)			_
Specification Doc.	LIGO-E0900041	Specification	Not specified in E0900041
Procedure Doc.	LIGO-E1000863		
1 <sup>st</sup> Scan (Mean ± Error*)	6.9 ± 2 ppm		
2 <sup>nd</sup> Scan (Mean ± Error*)	7.2 ± 2 ppm		
Conclusion	Qualified.		

<sup>\*</sup>An estimated systematic error from previous multiple measurements with one LIGO-1 mirror.

### **Discussions and Comments:**

Two scans of TIS measurement are carried out on the HR surface with positioning the arrow on barrel at Y+ direction. One is a full coverage scan over a 48 mm diameter aperture with the beam and step sizes of 0.3 mm and other a sampling scan over a 160 mm diameter aperture with the beam size of 0.3 mm and step size of 1.0 mm, as shown in Figs. 1 and 2 respectively. The system was checked and calibrated with a 1" HR mirror (No.8128).
