Hi Dennis -

SR3 has not been installed into the chamber yet. During the pre-balancing of the glass optic in the staging cleanroom near the chamber, a magnet on the optic got knocked off. I am asking for a waiver to NOT air bake the optic (34 deg C bake) after regluing this one magnet back on while the optic is still in the suspension. These are the small 2mm diameter magnet/dumbbells so a very small amount of glue is used. Waiver?
