

- * Aim for prompt alerts in O2 around
 - 30 minutes, after minimal vetting
 - Maybe, preliminary events sooner.
- * Liasons should have the ability to talk openly "in the bubble"
- * Understand need for clear plans on publications.
- * Understand need to share current understanding of GW events
 - (BBH? Real?)
- * Hope to flag any possible GRB coincidences

- * Public alerts in O3 (maybe 2017).
 - Nominal end to current MOUs
 - Open question if new MOUs are wanted
 - Collaborate on joint EM/GW papers
 - Provide more detailed/open information than possible in public alerts
 - Sharing of EM candidates within the bubble / collaborative follow-up
- * We should discuss specific goals for MOUs in era of public alerts, and consider critically if MOUs are needed
